erick.workspace@gmail.com

São Paulo - Brazil

Speaks Portuguese, English and Spanish.

Profile

Software engineer and international keynote speaker with deep expertise in Node.js and JavaScript, recognized globally with prestigious awards such as **Google Developer Expert**, **Microsoft MVP**, **GitHub Star**, and **OpenJS Path Finder Educator**.

With over a decade of hands-on experience, I've made key contributions to the **Node.js core**, working on modules like the **test runner** and **child process**.

As the founder of EW Academy, I've trained over 100,000 developers globally, sold more than 10,000 tickets for 18 advanced JavaScript courses, and generated over \$2M in sales.

In addition to my work in education and open source, at EW Academy, I architected and deployed a **Kubernetes cluster** from scratch using Azure Kubernetes Service (AKS), hosting over 40 microservices and supporting a platform with more than **10,000 monthly active users**.

I've also worked as an independent consultant, specializing in **JavaScript performance**, software architecture, and full-cycle software development—delivering scalable solutions and driving technical excellence across projects.

Experience

APPLIED AI ENGINEER, NODESOURCE (FULL-TIME) – 09/2025-PRESENT

At NodeSource, I worked as an Applied AI Engineer (Staff) and performance specialist, combining JavaScript, TypeScript, and Node.js expertise with AI systems design. I built agentic diagnostic solutions using LangChain.js, MCP servers, and observability tooling to help teams investigate performance issues across applications, databases, and infrastructure. These systems orchestrated calls across Grafana, Prometheus, Loki, and OpenTelemetry-based sources, correlated telemetry automatically, and helped identify root causes faster. In parallel, I advised on software architecture, performance optimization, and developer tooling, and contributed to N|Solid's monitoring, diagnostics, and security capabilities for production Node.js environments.

POSTGRADUATE COORDINATOR AND INSTRUCTOR, APPLIED AI ENGINEERING (LATO SENSU) – UNIPDS - 09/2025-PRESENT

At UNIPDS, I coordinate and teach a postgraduate specialization in Applied AI Engineering focused on training software developers to build production-ready AI systems. I help shape the curriculum and learning experience across topics including Generative AI APIs, LLMs, RAG, autonomous agents, fine-tuning, AI architecture, security, governance, and capstone projects. The program is delivered in a 100% online format with recorded lectures, monthly live sessions, and community support on Discord. The course is offered in partnership with Anhanguera and presented as recognized by MEC.

MAIN INSTRUCTOR & JS SPECIALIST, EW.ACADEMY – 02/2020-10/2025

International keynote speaker with over 140 talks delivered across 25 countries, specializing in JavaScript, Node.js, and web technologies, presenting in English, Portuguese, and Spanish. Founder of EW Academy, where I've sold over 10,000 tickets for 18 courses, training more than 100,000 people worldwide, and generating over \$2M in sales over 4 years.

As a core contributor to the Node.js project, I've made significant contributions to the Node.js test runner, child process, and other critical modules. I was the first in the world to **rebuild the Node.js project from scratch**, presenting this achievement at leading tech conferences in Europe and Brazil.

I teach advanced JavaScript concepts, ranging from JavaScript fundamentals to high scalable apps with Node.js and web technologies.

SENIOR PERFORMANCE ENGINEER, NODESOURCE (PART-TIME) – 11/2021 - 04/2022

At NodeSource, I specialized in analyzing and troubleshooting static JavaScript code, database queries, and application infrastructure, while optimizing existing applications for better performance. I provided consulting services on software design, architecture, and performance, and contributed to the development of the N-Solid product, enhancing its security and monitoring features for Node.js environments.

INDEPENDENT SOLUTIONS ARCHITECT AND TRAINER, ERICK WENDEL – 04/2018 - 02/2020

Working as a Solutions Architect, writing architecture documents and advising companies on top technologies such as Kubernetes, Serverless applications (AWS and Azure), and Node.js. Teaching them how to create scalable applications based on their resources. I have provided training for Microsoft, Gama Academy, Kroton Educacional, and Opah IT Consulting, covering topics such as Node.js, JavaScript, Docker, Kubernetes, and cloud computing technologies.

Customers: 013 Innovation Space, Gama Academy, GS1 Brasil, JLCP, Kroton Educacional, Microsoft Brasil, Opah IT Consulting, Resolv Risk.

Online training projects: Kubernetes Marathon, Mastering in node.js training, First steps using Typescript on VSCode.

LEAD SOFTWARE ARCHITECT, BEETECH GLOBAL – 06/2019-01/2020

Beetech is a company that develops financial products. As a Software Architect, I worked on the remessaonline.com.br product. My role was to identify performance issues in web APIs, routines, and more, and to design new microservices. I also assisted developers in creating and preventing issues in Node.js-based applications.

PARTNER AND CHIEF TECHNOLOGY OFFICER, HORIZON FOUR; 05/2017 - 05/2018

Horizon Four was a consultancy company focused on digital transformation and innovation. As the Technology Director, I made key decisions regarding tools, potential clients, and project directions. I was responsible for building and training new development teams. Eventually, we chose to go separate ways—my former partners focused on a product called Shawee, while I continued as an independent consultant.

Principal Technologies: Node.js, Python, JavaScript, GraphQL, C#, MongoDB, PostgreSQL, AWS, Microsoft Azure, Serverless applications, Linux-based servers, Kubernetes, Docker, and Ionic Framework.

Education

Software analysis and development - Faculdade Impacta Tecnologia (FIT), São Paulo
Brazil – Graduated, 01/2014 - 06/2016.

Postgraduate Specialization (Lato Sensu), Machine Learning Engineering (360 hours) -
Universidade Pitágoras Unopar Anhanguera - 2025-2026.

Licenses & Certifications

- JSNAD: OpenJS Node.js Application Developer - Issued in 01/2020

Honors & Awards

OpenJS Pathfinder educator

05/2023 - OpenJS Foundation

3x GitHub Star

08/2022 - 2024 | GitHub (Renewed 3 times)

7x Google Developer Expert - Web Technologies

01/2019 - Present | Google (Renewed 7 times)

9x Most Valuable Professional in Web Technologies (MVP)

02/2017 - Present | Microsoft (Renewed 9 times)

AWS Community Builder

10/2020 - Amazon Web Services

One of the first fifty OpenJS Node.js Application Developers certified in the world

01/2020 | OpenJS

DeveloperWeek SF 2019 Hackathon Best Use of Clarifai Winner

02/2019 | Clarifai

AngelHack Global Hackathon Series: São Paulo 1st Place Winner

07/2017 | AngelHack

Microsoft Student Partner (MSP)

07/2015 | Microsoft
